

Modular electric deck oven

2 decks composition

serieX is the first oven in the market equipped with Any Chef™ Technology, able to autonomously set the perfect baking cycle for any kind of product.

Ideal for **Any Business**, serieX grants a substantial saving in h/operator costs. Specific for **Any Product**, can fit **in Any Place**, thanks to energy consumption reduced by 45%.

The **intuitive interface** makes serieX suitable for **Any Chef**: everyone can be a baking master of **pizza**, **bread**, **pastry and gastronomy**. By choosing your recipe parameters, serieX will automatically set the temperature and baking time, and the user-friendly **TFT Touch display will show the best area to place the product**.

serieX takes the oven to another level: not only a tool, but also a precious partner to which delegate part of your daily work.

OPERATION

- Heated by highly performing armoured heating elements, working independently in each baking area
- SmartDeck™: thanks to the sensor system in each baking area, the heat is supplied only where needed, automatically regulating the heating elements power according to product type and quantity. The display always suggests the best area to use, allowing the right surface rotation and utilising heat at its best. The system determines the workload and automatically sets Auto EcoStandby™ for pauses or Auto PowerBooster™ for work peaks
- Adaptive BakingTime™ thanks to the software algorithm, the baking time adapts depending both on the heat quantity detected and on the product in the baking area
- Pre-set cycles with variable phases specific for bread, pastry and gastronomy products
- UI with intuitive sliders that allow to easily customise the baking result. Mapping
 is optimised for every product
- AdaptivePower® Technology: power management with P.I.D. permits automatic energy regulation based on the quantity of product baked
- DualPower+ ™: ceiling / floor temperature and power can be managed separately and simultaneously
- Continuous temperature detection inside the baking chamber through thermocouple
- Optimal heat balancing since the first baking
- Automatic pyrolytic cleaning program, PowerCleaning™
- Self-limited temperature at 400°C
- Vapour discharge by programable steam valve

CONSTRUCTION

- Front structure made of bent stainless steel
- Side panels in painted metal sheet
- Frontless hood
- Stainless steel door with external fairing for better insulation and safety
- Brushed stainless steel handles made with antiseptic finish
- Refractory brick baking surface
- Side and top internal structure made of aluminised steel
- Internal rear-view mirrors made of reflecting steel suitable for high temperatures (not applied for decks equipped with steamer)
- Oriented double LED light, placed in a protected position
- Heat insulation CoolAround® Technology

INTERNAL BAKING CHAMBER DIMENSIONS

 Internal height
 160mm

 Internal depth
 735mm

 Internal width
 475mm

 Baking surface
 0,35m²

ACCESSORIES

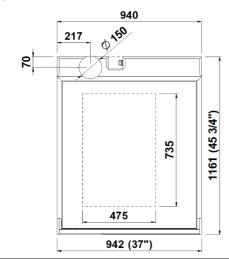

- Prover with wheels height 600, 800mm
- Stand with wheels height 400, 600, 800, 950, 1050mm
- Additional tray holder guides for prover and stand
- Programmable steamer with steam regulation
- Door opening upwards
- Multipoint core probe
- Self-condensing hood
- Kit support feet for countertop installation H=15mm
- Remote-Master® Technology

STANDARD EQUIPMENT

- Multilanguage, antiglare, colour display TFT Touch 7" IPS
- Customisable baking cycles according to your dough
- 4 different working modes: Bake, Regenerate, Prebake, Refining®
- Auto EcoStandby™ for work pauses
- Auto PowerBooster[™] for work peaks
- Oven front/rear power balance DeltaPower+™
- ReadyToGo Timer, optimised switch on based on baking time set. Two daily start and stop programmable.
- FlexLoad™ automatically identifies where the work load is activating the heating elements in the corresponding area
- · Self-diagnosis with error message on display
- Multi timer

TOP VIEW

- Maximum temperature independent safety device
- USB port and WiFi module for software update
- SmartBaking app
